

## *High Capacity Series*

### *HC Series*

The High Capacity (HC) series of refrigerators are designed for storing large quantities of a variety of materials at cryogenic temperatures. Provides temperatures of  $-196^{\circ}\text{C}$  at the liquid surface, and  $-190^{\circ}\text{C}$  at the top of the canisters. This series also offers a low-profile model (HCL12) with 5-inch (125 mm) canisters.

# HC Series

## Features

- Large storage capacity
- Rugged Construction – ribbed high strength aluminum body, magniformed necktube design, and more durable paint
- Numbered index ring and tapered internal canister locator.
- Superior vacuum performance with super insulation provides maximum holding times
- Security – Lockable lid and optional low level alarm with remote connection available
- Mobility – Roller bases are available for all models

(1) Evaporation rate and static holding time are nominal. Actual rate may be affected by the nature of the contents, atmospheric conditions, container history, and manufacturing tolerances.

(2) Work time is an arbitrary, reference-only value to estimate container performance under actual operating conditions.

(3) Without canisters.

(4) Optional 7th canister available to increase storage capacity by 23%.
