STORAGE RECOMMENDATIONS

Store in cool dry place. Do not store where temperature may rise above 120 F. Do not store in highly humid or damp areas.
*Gloves are counted by weight.

IMPORTANT

We offer Nitrile, Vinyl and Latex gloves. Different jobs and applications require a different glove. These gloves are not suitable for every application. Always exercise caution when using any glove. Make sure that your glove is designed for your specific needs. Keep in mind, no glove will resist all chemicals or will last for extended periods of time. If at any time, the glove dissolves, swells, wrinkles, deforms, changes color or changes in any way as a result from chemical contact, replace immediately. Please keep these gloves away from open flames. When done, dispose of properly. Do not reuse gloves as they are designed for single use only. Failure to follow these instructions could result in injury or harm.
